OPEN EYES. OPEN VOICES. NO BANS

PRESS RELEASE 8/11/25

BANNED-IT.COM TO LAUNCH CENSORED VAULT - A USER-DRIVEN ARCHIVE OF SILENCED TRUTH
"They censored it. We archive it. You submit it". Coming Soon!

Internet freedom platform Banned-It.com today announced the upcoming launch of the CENSORED VAULT, a public, crowdsourced archive of articles, posts, reports and books removed, shadowbanned or rewritten by platforms, governments or institutions. Set to go live, date TBC, the CENSORED VAULT will debut with 20+ verified cases of digital suppression including:

- The EPA's 2025 rewrite of climate indicators where rising temperature data was downplayed.
- Huckleberry Finn and Uncle Tom's Cabin, still challenged in U.S. schools for racial themes.
- HHS.gov's COVID-19 Vaccine Equity page, quietly replaced with anti-vax messaging.

Each entry will include:

- Original archive link
- Documented reason for censorship
- Fair-use excerpt with commentary

Unlike traditional archives, the CENSORED VAULT is open for submissions. Any user can upload proof of their own shadowban, deletion or scrub - no approval required. Every submission is auto-tagged "USER-SUBMITTED" and hosted with the disclaimer: "User-submitted. No endorsement or liability."

The CENSORED VAULT launch comes amid a surge in digital censorship:

- 3,000+ government web pages altered in 2025
- 15+ classic books challenged in schools
- Millions of social posts throttled by AI moderation

Running alongside the OPEN zone, the no-filter community for rants, memes and free speech, the addition of the CENSORED VAULT creates a unique dual engine platform with full public access for submitting, posting and commenting without moderation. True free speech.

"The internet is being rewritten in real time," the team added. "The CENSORED VAULT is our counter-memory and it's almost here". A confirmed date will be announced soon at www.banned-it.com.
